

Water Storage Solutions

Multipurpose Subby Tanks

Revolutionary Storage Solutions

The Polyworld Difference

- Unique above ground design
- Light Weight and Relocatable
- Impact Resistant
- Engineer Certified
- Modular System
- Rain Water Harvesting
- Custom outlets, valves and Camlocks

Multipurpose Subby Tanks

Industrial Submersible Tanks

Discover our innovative range of Multipurpose Subby Tanks, specifically engineered to meet your underground storage needs. Designed to seamlessly fit within a standard six-meter shipping container, these tanks offer a discreet and space-efficient solution.

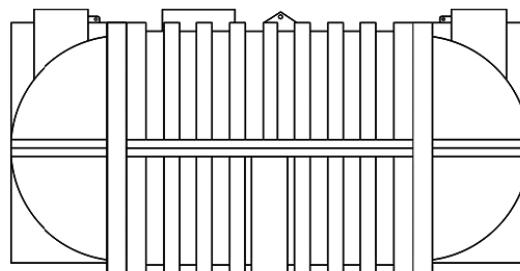

With two distinct designs available, including a 10,000L Long tank and a 4,000L sphere, these tanks provide versatile options to suit various requirements.

Built with ultra-heavy-duty materials, these tanks are exceptionally strong, making them an optimal choice for water or sewerage treatment applications where durability is paramount.

Crafted to withstand the test of time, our Multipurpose Subby Tanks are built for longevity.

Constructed from UV-stabilized LLDPE, they are designed to resist environmental factors and maintain their integrity over years of use. This makes them an excellent option for rainwater harvesting systems and storm surge water storage, ensuring a reliable and efficient solution for managing water resources.

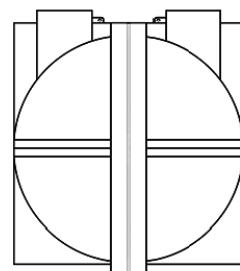

Despite their robust construction, these tanks remain impressively lightweight, allowing for ease of installation and maintenance. Choose our Multipurpose Subby Tanks for an underground storage solution that offers strength, versatility, and long-lasting performance.

10,000L

2.1W x 3.8L x 2.0H

- Modular
- Hemispherical Ends
- Double Cylindar with 2 ends
- Single 2m cylindar with 2 ends
- Made to suit 20ft Containters
- Riser Available

4000L

2.1W x 1.8L x 2.0H

**All underground installations of our Underground Storage Tanks require prior inspection by a hydraulic engineer to ensure the grounds are suitable.*
