Open Top Stackable Water Storage Tanks

Proudly Made In Australia

- Tanks are ideal for the storage of large volumes of water, required in remote settings. They can be interconnected with 90mm PVC pipes to allow for a high water volume flow.
- Tanks can be stacked inside one-another for easy transportation yet they are light which allows them to be lift craned onto transport.
- Tanks can also be used as mud tanks - being chemically inert, it won't deteriorate in the presence of acid, alkali, salt or chlorine.

Product Ordering Code	Capacity		Height		Diameter/Width	
	LITRES	GALLONS	METRIC	IMPERIAL	METRIC	IMPERIAL
PP12000	12000	3170	1350	4' 4"	3400	11' 2"
PP5000	5000	1320	1300	4' 3"	2300	7' 6"

* All volumes and sizes are nominal.

* For any intended use either partially in ground or buried you must consult your hydraulic engineer, for installation requirements. – Failure to do this will void any warranties.

Talk to Polyworld today for professional advice and custom solutions for all your material handling and water storage requirements.
