

Filter System Diagram and Instructions

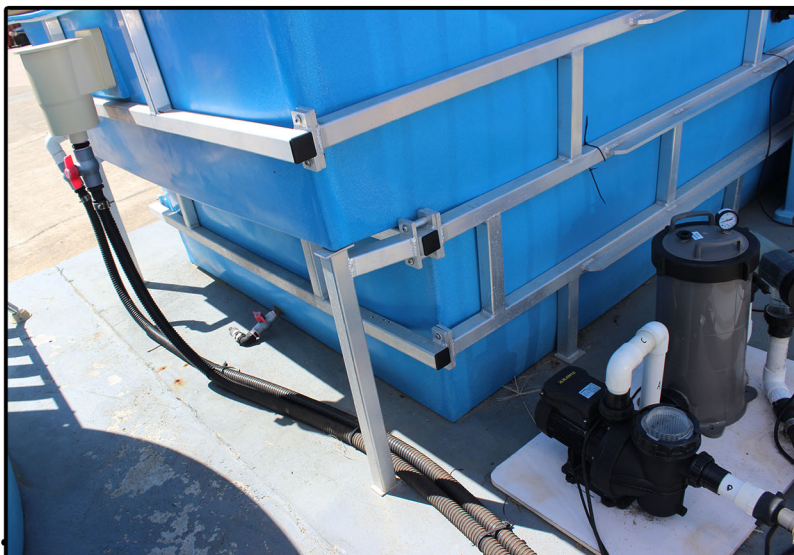

Contents:

- 1 x **A** Piece
- 1 x **B** Piece
- 2 x **C** Pieces
- 5 x **D** Pieces
- 5 x **Elbow** Pieces

Your Polyworld Filter System ships with 5 interchangeable elbow pieces and 5 D pieces, that here have been numbered 1-5, they are interchangeable and numbered only for the clarity of instructions.

All joints need to be appropriately sealed with PVC pipe cement. We **Strongly** recommend dry fitting and assembling the whole filter system before gluing anything.

- 1) Connect Piece **D1** into the top of the Pump, then attach **Elbow 1** to it.
- 2) Install Piece **D2** to the filter cartridge, then **Elbow 3** to it, then attach piece **A** to **Elbow 2**, then attach **Elbow 3** to the top of **Piece A**,
- 3) Use a **C** Piece to join **Elbow 1** and **3** together, this connects your Pump to your Filter Cartridge.
- 4) Connect Piece **D4** to the Filter Cartridge, then use the other **C Piece** to connect your Chlorinator, this connects your filter cartridge to your Chlorinator.
- 5) Next take **Piece B** and connect it to your Chlorinator, then Connect **Elbow 5**, connect **D5** to Elbow 5.
- 6) Connect **D3** to the Pump

From here connect the pump and chlorinator to the skimmer box and fish eye as normal.
Installation guides for the Skimmer Box and Fish Eye can be found on our youtube channel at:
